SPECIAL CONSIDERATIONS

Special considerations and precautions (regarding school activities, field trips, sports, etc.):

****SEIZURE EMERGENCIES. CALL 911****		
First time seizure	**Food is aspirated (blocking airway)**	**Repeated seizures**
Student with Diabetes	**Breathing difficulties**	**Seizure > 5 minutes**
Student who is pregnant	**Different seizure type than student's usual**	**Head injury**
Seizure occurs in water	**Consciousness is not regained**	**other:**

SEIZURE EMERGENCY MEDICATION (Please attach Seizure Emergency Medication/Management form)

This student has a Seizure Emergency Medication ◯ yes ◯ no

Location of Medication:_____________________________

VAGUS NERVE STIMULATOR (Please attach Seizure Emergency Medication/Management form)

This student has a Vagus Nerve Stimulator (VNS) ◯ yes ◯ no

Location of the magnet:_____________________________ Location of VNS on student's body:_____________________________

SEIZURE INFORMATION (please check all seizure categories that apply to this student)

◯ ***Tonic Clonic (Grand Mal)***

Triggers	Length	Frequency

If you see this:

- Sudden hoarse cry or shout
- Loss of consciousness
- May fall if standing
- Muscles become stiff (tonic)
- Convulsions or stiffening of extremities followed by rhythmic jerking (clonic)
- Shallow or irregular breathing
- Occasionally cyanotic (blue skin, nails, lips)
- Drooling/Vomiting
- Biting the tongue or inside of the mouth
- Loss of bladder and bowel control
- other:____

Do this:

- Time the seizure
- Gently guide the student to the floor
- Cushion head with something soft
- Remove harmful objects
- DO NOT put anything in mouth
- DO NOT restrain
- Place in rescue position/protect airway
- Explain/reassure others
- Protect student's privacy
- After the seizure is over, reassure/reorient
- Do not leave student alone
- Check for injuries/provide first aid
- Record on Seizure Observation Record
- other:____

adapted from the epilepsy foundation and with permission from the Utah Department of Health EPICC program
07/18

◯ *Absence*

Triggers	Length	Frequency

If you see this:

Blank stare or lapse of awareness
Mistaken for daydreaming,
inattentiveness, or ignoring

Talk to student and touch their shoulder.
If they respond, less likely to be a seizure
other:____

Do this:

Time the seizure. Usually only 5 - 10 sec
Explain/reassure others
Do not leave student alone

After seizure is over:
Speak softly/reassure/reorient
Record on Seizure Observation Record
other:____

◯ *Focal Onset (Simple Partial)*

Triggers	Length	Frequency

If you see this:

Only one part of brain is involved so
consciousness is not impaired
Student is aware
Experience sensory symptoms like
tingling, numbness, sounds, smells,
visual distortions
Twitching or smacking lips

Student may experience psychic symptoms,
like deja-vu, hallucinations, fear, anxiety,
or feelings he/she can't explain
May be confused with acting-out behavior or
psychological problems
Eyes or head turned to the side
other:____

Do this:

Time the seizure. Usually < 2 min.
Explain/reassure others
Do not leave student alone

After seizure is over:
Speak softly/reassure/reorient
Record on Seizure Observation Record
other:____

◯ *Focal Impaired Awareness (Complex Partial)*

Triggers	Length	Frequency

If you see this:

Consciousness may be affected
in some way
Student may be partially aware, dazed,
or confused
Wandering, fumbling, getting in
someone's "bubble"
Lip smacking, picking at clothes

Non-sensical speech, difficult to understand,
or talking jibberish
Confused with being drunk, drug abuse,
or aggressive behavior
other:____

Do this:

Time the seizure. Usually 1 - 2 min.
Explain/reassure others
Do not expect verbal instructions
to be obeyed
Gently guide student away from
potential hazards

Do not restrain or the student may become combative
Do not leave student alone
After seizure is over:
Reassure/reorient
Record on Seizure Observation Record
Other:

Student Name ____

adapted from the epilepsy foundation and with permission from the Utah Department of Health EPICC program
07/18

◯ ***Atonic (Drop)***	**Triggers**	**Length**	**Frequency**

If you see this:

Sudden, brief loss of muscle tone
Head nods to total body drops
This seizure often causes injury
other:____

Do this:

Time the seizure. Usually only 1 - 2 sec
Protect airway
Explain/reassure others
Do not leave student alone
Check for injury/provide first aid
Record on Seizure Observation Record
other:____

◯ ***Myoclonic***	**Triggers**	**Length**	**Frequency**

If you see this:

Rapid, brief body jerk
May occur singly or in clusters
Affects certain muscle groups, or one or both sides of the body
other:____

Do this:

Time the seizure
DO NOT restrain
Speak softly/reassure/reorient
Do not leave student alone
Explain/reassure others
Check for injury/provide first aid
Record on Seizure Observation Record
other:____

EXPECTED BEHAVIOR AFTER SEIZURE - Return to baseline time is approximately 30 minutes

Behavior: *Regular breathing, sleepiness, weakness, nausea, confusion.* ***Instructions:*** *Reorient student. Allow student to rest/sleep. Stay with and monitor student. Do not give anything to eat or drink. Record on Seizure Observation Record.*

SIGNATURES/RELEASE OF INFORMATION - As Parent/Guardian of the named student:

* I give permission for my child's Health Care Provider to release/share information with the District Nurse for the completion of this plan of care and to exchange health information and records.
* I understand the information contained in this plan will be shared with Madison School District staff on a need-to-know basis.
* I give permission to the District Nurse and other Madison School District staff to follow this Emergency Care Plan and administer medication as directed.
* I agree to release, indemnify, and hold harmless the District Nurse and other Madison School District staff from lawsuits, claim expense, demand or action, etc., against them for helping my child with seizure treatment, provided the personnel are following physician instruction as written in this emergency care plan.
* I understand I am responsible for maintaining necessary supplies, medication, and equipment.
* My child and I understand there are serious consequences for sharing any medication with others.
* I understand I am responsible to notify the District Nurse of any change in my child's health status, care, or medication order. If the prescription on the medication order is changed, I understand a new Medication Request Form and Emergency Care Plan Form must be completed before the school staff can administer the medication.
* I understand that if any emergency medication is administered at school, Emergency Medical Services (EMS) will be notified for evaluation, monitoring, and possible further treatment.
* I understand that if my child is given emergency medication, he/she may not remain at school unless I can be present to monitor him/her for adverse reactions or unless he/she is cleared in writing by a medical professional. I understand that trained school employee volunteers can only monitor him/her until I arrive or EMS arrive.

EMERGENCY SEIZURE RESCUE MEDICATION - A Medication Request Form is required for each medication

In addition to this Medication/Management Form, an Emergency Seizure Health Care Plan must be developed and signed by the Parent/Guardian, Physician, and District Nurse.

If Emergency Medication is administered:

* ALWAYS call 911, Parent/Guardian, and District Nurse if emergency medication is administered! Document on Seizure Observation Record and Incident Report Form.

* If a student is given emergency medication, he/she may not remain at school unless the parent/guardian can be present to monitor him/her for adverse reactions or unless he/she is cleared in writing by a medical professional. Trained school employee volunteers can only monitor the student until the parent/guardian or Emergency Medical Services (EMS) arrive.

Medication:	Dose:	Route:

Administer Emergency Medication If:

◯ If seizure lasts __________ minutes or greater.
◯ If _________ or more consecutive seizures occur with or without a period of consciousness in _________ minutes.
◯ other ____

Common potential side effects:

Respiratory depression, memory loss, drowsiness, other____
